Period: From – 2013/03/06 to 2015/01/03

**Ceos Profile**

CEOS Technologies is IT Company that provides the following solutions: Network solution, Desktop support, Servers support, IT infrastructure and ICT Project management on a national level.

## Job Description

**Project management Duties**

- Managing Projects and Portfolio
- Define a project objectives
- Define a Project Scope
- Define a project triple constraints(time, schedule and time)
- To make sure that project's life circle stage are defined (defining/initiation, Planning, Executing and Delivering)
- Closing the project

**My duties as per each and every stage**

**Defining Stage:**

- I and senior project manager define the project objectives and make sure that are understood.
- I and senior project manager we define a communication plan.
- I define all the tasks need to be done with senior project manager.
- I and project administrator organize all paperwork which is necessary to help to carry out the project
- I define responsibilities, if we have to outsource some of work to subcontractors.

**Planning Stage:**

- I and senior project manager we define schedule (start and end time) of the project if we were the one quoted the external project or else we work on defined schedule by the client.
- I calculate a profit of the project within a budget on a scale of 20%
- I and Project administrator create a bill of material , costing sheet, sales sheet and bill of quantity
- I and Project administrator, we make sure all resources are available to carry out the project. By resources are mean materials, tools and human resources.
- I and project manager we assign the human resources to defined tasks on definition stage according to their skills and knowledge.
- I and project team we seat in a meeting and discuss what will be the risks in project objectives and come up with risk management plan other risks will be tracked as project progresses and mitigated.

**Executing Stage:**

- I keep and track the records as how far with project and check if we still within a budget time and scope.
- I am responsible to update client as how is the progress of the project even on request**.**
- Identify and records what can be potentially a threat to project's objective and try to mitigate.
- Ensuring good communication, feedback and team work to contribute towards achieving the company's goals and objective.
- I define responsibilities, if we have to outsource some of work to subcontractors.
- Attending a status meetings with senior project managers and client
- Creating a weekly reports on my project to Ceos management
- Controlling projects by leasing with stakeholders and project team to make sure quality is gained through meeting triple constraints(time, schedule and time)

**<u>Delivering Stage</u>:**

- Organize relevant documents if senior project manager need to train client with a product.
- Store all the documents were used in projects for future reference.
- Release resources were used in a project and human resources.
- Obtain acceptance from client in a form of sign offs.
- Invoice the client with my account department.
- Making sure all the claims were claimed and subcontractors were paid.

**My Responsibilities**

**Responsibilities to Excalibur by FutureSoft**

- I was responsible for Ops ticket of daily operation
- Testing my work and deploy to testing and prod environment
- Building enhancement or new functionality

**Project refactoring**

On refactoring, technologies used was entity framework which was communicating with SQL sever, ASP.Net MVC but we spiced the pattern to accommodate MVVM where model is concern with your data and your viewModel is get to bind to your view and KendoUI, JQuery, Bootstrap, knockout, Htlm. Font awesome

- I was responsible to build tables on SQL Server
- Responsible for implementing DBsets with the model
- Responsible for building Data, Business and view layers
- Responsible for implementing Unit of work pattern and inversion of control
- Responsible for front end using kendoUI for your viewModel binding
- Responsible for implimeting layout using bootstrap most of all icons we used font awesome

At FutureSoft each one of us "developer" was responsible for a few pages to be refactored and deploy to Testing environment

**Responsibilities to Vericlaim by Medicharge**

- I am responsible for Ops ticket of daily operation this can include support on data
- Do recreation testing before deploying to UAT our testing environment
- Still Building enhancement or new functionality but only on new sytem

**Project refactoring**

On refactoring, technologies used is still entity framework which is communicating with stored procedures, we using repository pattern which is EDMX our data layer, Business logic and WCF Services that is been exposed to our website. On website we using Angularjs for model binding, bootstrap, Jquery, Font awesome icons, glyphicon icons and some third-party directives.

- I was responsible creating stored procedure
- Responsible for implementing EDMX for created stored procedure
- Responsible for building Data, Business and WCF Service
- Responsible for front end using AngularJs
- Responsible for implimeting layout using bootstrap most of all icons we used font awesome and glyphcon

At Medicare I was part of team(4 developers) which was refactoring diary the most important part of Vericlaim it took us 8 months to complete it, It is on pilot stage now. I am working on assistant which it is another portion of Vericlaim, I am reusing old stored procedures and building this from your server side all the way to client side

## Skills Matrix

| Skill | Level(10) | Months Experience |
